**Attachments:** Bullseye Initial Notification -- Signed.pdf

I looked this over and noticed some oddities. They say it includes all furnaces over 50 but then they say 4 are under 50 (maybe the difference is actual vs potential??). It also excludes several furnaces in common use including furnaces 5 and 6. Off the top of my head I know furnace 5 regularly melts glass with haps and it has a capacity over 50 tons/yr (closer to 150).

So not sure what to do with this information. Under 65 they are allowed to move around their capacity right? Though since they are submitting it late, shouldn't it reflect recent operation? Madonna, does an issue like this generally go straight to enforcement or do you have any correspondence with companies (in a typical situation, I realize this isn't exactly typical).

katie
